

HHH PTA COUNCIL'S
TASK FORCE / PARENT RESOURCE Committee together with REACH CYA

Please join us for a FREE presentation for parents and kids ages 11+

The Dangerous, Long-term Effects of Drug Use on Developing Brains

Presented by Dr. Stephen Dewey

**Alcohol - Vaping - Caffeine - Energy drinks - Nicotine - Medications -
Opiates - Ecstasy - Juuling - and more.**

Dr. Dewey has put virtually every drug of abuse (legal and illegal) to the test. His findings have led to a deep understanding of how the adolescent and teen brain can so easily and deeply be altered by even occasional drug and alcohol use.

This presentation will empower parents with the knowledge and confidence to guide their children through the adolescent and teen years.

Actual PET images will be shown and discussed. Kids in 6th grade or higher are welcome too!

Stephen Dewey, PhD, Neuroscientist and Research Director, NYU School of Medicine has been studying the effects of addictive drugs on the brain for decades. He uses advanced brain imaging to illustrate the ways in which drugs affect the brain's chemical makeup, and the lasting damage they can do. His research has been featured on 20/20, Dateline, Good Morning America, ABC, CBS, NBC, CNN, FOX, FOX News, News 12 Long Island, the Wall Street Journal, the New York Times and Newsday.

APPROVED FOR DISTRIBUTION
DEC 05 2018
DR. PATRICK HARRIGAN
SUPERINTENDENT OF SCHOOLS

Tuesday, January 15, 2019 7:00pm
HHH High School East, Lecture Hall, 50 Vanderbilt Parkway, Dix Hills
