

Attention HHH community!

The HHH Robotics Team, shared between both High School East and West, is looking for adult mentors to work with our team for the remainder of the year, occasionally over the summer, and the upcoming school year. We are in need of mentors familiar with CAD, fabrication, mechanical and electrical engineering, software design, programming, and coding. We are a well-established and winning team, and we are looking to improve, learn more about designing and building robots, and sharing STEM to our community and beyond. We are eager and committed to our team and welcome anyone who can help up make our team stronger.

APPROVED FOR DISTRIBUTION

JUN 07 2019

DR. PATRICK HARRIGAN
SUPERINTENDENT OF SCHOOLS
