Mobile App Setup Guide for Smartphones (iPhone, Android, Blackberry, etc.)

The **CalendarWiz Mobile App** allows permitted users to view, add, and edit events via a Smartphone, including iPhone, Android, Blackberry OS 6, Windows and more. Please note that this "app" is a browser-based interface so there is no file to download. It's easy to setup so let's get started!

Access the browser-based Mobile App via these steps:

1. Open your Smartphone browser and enter the following link.

<http://www.calendarwiz.com/hhddistrictcalendar>

2. Select the "Mobile" view option when prompted.
3. Access the Mobile app directly via the link below:

<http://www.calendarwiz.com/mobile.html?crd=hhddistrictcalendar>

Mobile Navigation Instructions:

- Days with a dot beneath the number have events in them and may be viewed with a simple touch.
- Swipe Control and Navigation arrows allow you to go from month to month. Click "Today" to return to the current month.
- Day view: click on an event to view the event details and description. Use the "Done" button to return to month view.

Android Users can create a shortcut icon for your Home Screen:

Open Mobile Calendar in browser -> Tap the Menu button -> Tap "Add Bookmark"
Next, long press (for a few seconds) a blank spot on your desktop and click the Add Shortcut button.
Then select your calendar bookmark.

iPhone Users can create an icon for your Home Screen:

Tap the  sign at the bottom of your iPhone -> Select "Add to Home Screen" -> Name Calendar -> Click Add - The CalendarWiz icon will appear in your iPhone desktop.
